

Earth Day Activities for Kids

Learn About Composting - www.mansfieldct.org/Schools/MMS/compost. A very informative site designed to teach kids about composting. Also contains useful information about Mansfield Middle School's food waste composting program. Could your school do something similar?

Global Footprints - www.globalfootprints.org. An introduction to the concept of global footprints. The children's part of the site includes games, facts, poems, stories, quizzes, and web links on the subject of sustainability. For teachers and parents there is background information and classroom activities.

Waste Free Lunch Program – www.epa.gov/epaoswer/education/lunch.htm
Learn about how you can make a difference by packing a waste free lunch.

Recycled Crafts - www.kidsdomain.com/craft/irec.html Lots of neat recycled craft projects using a variety of materials for kids of different ages.

Environmental Kids Club - www.epa.gov/kids/garbage.htm. Waste education resources from the US Environmental Protection Agency, including Recycle City, in which you explore how an imaginary town has restored itself from Dumptown to Recycle City.

Resources for Environmental Education - Environmental education for students separated by age groups, (K-5), (6-8), and (9-12).
www.epa.gov/epaoswer/education/index.htm

Recycling Curriculum For Teachers–
www.recyclenore.org/article_subpage.asp?subpagekey=111 A good compilation of resources from around the country.
